Summary

Results-driven B.Tech Computer Science & Engineering student with hands-on experience in full-stack web development, cloud infrastructure, and machine learning. Built and deployed 5+ production-grade applications using Next.js, TypeScript, Node.js, and PostgreSQL. Proficient in designing RESTful APIs, implementing role-based access control (RBAC), and managing CI/CD pipelines with Docker, Nginx, and AWS. Oracle OCI certified with additional credentials in Google Cloud.

Education

Kalinga Institute of Industrial Technology <i>Bachelor of Technology in Computer Science & Engineering</i>	July 2023 - May 2027 Bhubaneswar, Odisha
• Relevant Coursework: Introduction to C Programming, Data Structures and Algorithms (C), Object Oriented Programming (Java), Operating Systems, Database Management System (Oracle Database Express Edition XE), Computer Network, Design and Analysis of Algorithms, Software Engineering • Relevant Elective: Linux System Administration (Red Hat Enterprise Linux), Computational Intelligence, High Performance Computing (MIPS), Cloud Computing, Deep Learning	
Royal Public Sr. Sec. School <i>Intermediate in Non-Medical with Computer Science</i>	April 2021 - April 2022 Gurgaon, Haryana
• Relevant Coursework: Introduction to Python Programming, Implementing Basic Data Structures in Python, Database Management System (MySQL), Connecting MySQL to Python	

Experience

Google Developer Group, KIIT Tech. Society, Part-time <i>Full-Stack Developer</i>	Feb 2025 - Present Bhubaneswar, Odisha
• Built and maintained event registration web applications using Next.js and TypeScript, serving 500+ students. • Collaborated with cross-functional teams to deliver tech workshops and hackathon platforms on tight deadlines.	
GeeksForGeeks, KIIT Tech. Society, Part-time <i>Full-Stack Developer & DevOps Engineer</i>	Feb 2025 - Present Bhubaneswar, Odisha
• Developed and deployed 3+ event websites using Next.js, TypeScript, and Node.js, handling 1,000+ users. • Optimized cloud-based hosting on AWS with Docker and Nginx, reducing page load times by 40%. • Proposed and built a university class schedule website, streamlining academic scheduling for 2,000+ students.	
IoT Lab, KIIT Tech. Society, Part-time <i>Full-Stack Developer & DevOps Engineer</i>	Jan 2025 - Present Bhubaneswar, Odisha
• Architected and developed an Admin Dashboard and RESTful Backend API for an Events Registration App using Node.js and Express. • Collaborated with a team of 8+ developers to deliver event management websites with role-based access control. • Mentored 10+ peers on DevOps best practices, including Docker containerization, networking, and AWS cloud deployments.	

Projects

GradeX LMS - Learning Management Platform <i>Next.js, TypeScript, Node.js, Drizzle ORM, PostgreSQL, AWS, Cloudflare R2</i>
• Designed and implemented a custom multi-tenant Role-Based Access Control (RBAC) framework supporting 4 distinct user roles from scratch. • Engineered a secure credential authentication system with session management, reducing unauthorized access incidents to zero. • Developed an AI-driven quiz portal and automated assignment grading system using the Gemini API. • Built automated email notification workflows leveraging AWS Simple Email Service (SES).
PrepCrate - Academic Resource Portal <i>Next.js, Node.js, TypeScript, Drizzle ORM, PostgreSQL, Cloudflare R2</i>
• Engineered a centralized platform for university students to access and share previous year question papers and study materials. • Implemented a responsive frontend using Next.js and shadcn/ui, achieving sub-2-second page load times. • Integrated Cloudflare R2 for scalable PDF storage with type-safe database interactions via Drizzle ORM, managing 500+ documents.

Schedule Orchestration WebApp | *Next.js, Node.js, TypeScript, REST API, Express, Drizzle ORM, PostgreSQL*

- Developed and deployed a full-stack schedule orchestration platform serving 2,000+ university students.
- Designed a scalable RESTful backend with Node.js, Express, and Drizzle ORM, handling 100+ API requests per minute.
- Deployed the application using Docker and Nginx on AWS EC2, achieving 100% uptime with automated health checks.

Sentiment Analysis ML Model for Movie Reviews | *Python, Scikit-learn, NLTK, Pandas, IMDB Dataset*

- Built a machine learning classification model achieving 89% accuracy on the IMDB movie review dataset.
- Preprocessed 50,000+ reviews using tokenization, stop-word removal, and TF-IDF vectorization with NLTK and Pandas
- Evaluated Logistic Regression and Naive Bayes classifiers, optimizing hyperparameters to maximize F1-score.

Single Image Super-Resolution (SISR) using CNN & GAN | *Python, PyTorch, OpenCV*

- Developed a machine learning pipeline utilizing Convolutional Neural Networks and Generative Adversarial Networks to reconstruct high-resolution images from low-resolution inputs.
- Engineered the architecture and conducted model optimization under the academic guidance of Dr. Partha Pratim Sarangi at KIIT Deemed University.
- Implemented custom loss functions combining adversarial and content loss to preserve high-frequency textures and significantly enhance visual sharpness.

Technical Skills

- **Languages:** TypeScript, JavaScript, Python, Java, C, C++, HTML, CSS, SCSS, SQL
- **Frameworks & Libraries:** Next.js, React, Express, Tailwind CSS, Scikit-learn, TensorFlow, Keras, NLTK, Pandas
- **Databases & ORMs:** PostgreSQL, MySQL, MongoDB, Oracle SQL, Firebase, Neon, Supabase, Drizzle, Prisma, Mongoose
- **Cloud & DevOps:** AWS (EC2, S3, SES), Google Cloud Platform, Docker, Nginx, Cloudflare R2, CI/CD, Networking
- **Authentication & Security:** OAuth 2.0, JWT, Auth.js, Clerk, Firebase Auth, Auth0, Role-Based Access Control (RBAC)
- **AI & Machine Learning:** Linear/Logistic Regression, SVM, Naive Bayes, KNN, Random Forest, CNN, GAN, NLP, Fuzzy Logic, Genetic Algorithms
- **Tools & Platforms:** Git, GitHub, Postman, Node.js, Deno, Bun, Arduino, ESP32, STM32, Neovim, VS Code
- **Concepts:** Data Structure & Algorithms, Automation, Big Data, Data Analytics, Data Science, REST API, Model View Controller (MVC), WebSockets, System Design, Database Normalization, Reverse Proxy, Load Balancing, Agile Development, Software Development Lifecycle (SDLC)

Certifications & Licenses

Google Cloud Certification: Cloud Security Engineer Professional Certificate <i>IAM, Network Security, VPC Security, Data Protection</i>	July 2026 <i>Google Cloud Training via Coursera</i>
Developing Applications with Google Cloud Specialization <i>App Engine, Cloud Run, Cloud Functions, Pub/Sub, Storage</i>	July 2026 <i>Google Cloud Training via Coursera</i>
Architecting with Google Compute Engine Specialization <i>Compute Engine, Load Balancing, Auto-scaling, IaC, VPC Networks</i>	July 2026 <i>Google Cloud Training via Coursera</i>
Data Engineering <i>ETL Pipelines, MySQL, Docker, Apache Airflow, Data Warehousing, Data Modeling</i>	April 2026 <i>ExcelR</i>
Google Data Analysis with Python Specialization <i>Pandas, NumPy, Data Cleaning, EDA, Matplotlib, Data Visualization</i>	Oct 2025 <i>Google via Coursera</i>
Machine Learning Foundations <i>Python, Scikit-Learn, Regression, Classification, Clustering</i>	Sep 2025 <i>University of Washington via Coursera</i>
OCI AI Foundations Associate  <i>Generative AI, Machine Learning Concepts, Cognitive Services</i>	Sep 2025 - Sep 2027 <i>Oracle Cloud Infrastructure</i>
OCI Foundations Associate  <i>Cloud Architecture, Core Services, Virtual Cloud Networks, Cloud Storage</i>	Sep 2025 - Sep 2027 <i>Oracle Cloud Infrastructure</i>
Red Hat System Administration I (RH124) <i>Linux Command Line, Bash Scripting, File Permissions, User Management, Service Configuration</i>	Feb 2025 <i>Red Hat</i>
